## Monthly Air Pollution Control Program Summary Report Concerns Received or Investigated Between March 16, 2021 and April 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

### Concerns Received During Report Period

	Total
Total	77
Asbestos	5
Fugitive Particulate Matter	5
Hazardous Air Pollutant Release	1
Odor	24
Open Burning	31
Other	11

### Concerns Investigated During Report Period

	Total
Total	71
Concerns Received Before Report Period	11
Concerns Received During Report Period	60

Number of Notices of Violation Issued: 1

Number of Referral Notices of Violation Issued: 0

Number of Letters of Warning Issued: 8

Please note, the information provided in this report reflects all concerns investigated during the reporting period, regardless of the date on which the original concern was received.

## Monthly Air Pollution Control Program Detail Report Concerns Received or Investigated Between March 16, 2021 and April 15, 2021

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	3/17/2021	3/12/2021	Sutton Trucking, Inc.	Archie Cass	Fugitive Particulate Matter	DS		

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between March 16, 2021 and April 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p><b>Concern No.</b> 45459    <b>Concern Info</b> The company is located directly across the street from my house. The name of the company is "Sutton Trucking." When we first bought our house, the huge huge building was not there, and we never experienced any problems with dust or the continuous semi trucks coming and going all through the night. It was quiet.</p> <p>About 2 to 3 years ago, they built a huge building and railway to the building. Now its loud and busy, and the dust is extreme all the time and year round. Of course, right now you won't find dust blowing because it has rained recently.</p> <p>My 7 year old daughter has allergies and is prone to getting sick easily. Also, I have spoken to my neighbors and they would be willing to chat as well. We all feel the same way about the excessive dust.</p> <p>I would like to add that the daycare (Learning Castle) that you can see pictured in the attachment is located on Main Street. My children attend this daycare, and the daycare is willing to speak to you as well about the dust issue. They cannot allow the children to play outside sometimes because of the dust.</p> <p>The neighbor who lives behind me is Jason Norton. He is on the Archie city board and has made complaints about the dust as well. He would be willing to speak to you as well.</p> <p><b>Comments</b> No fugitive dust was observed during the investigation; however, conditions were not favorable for dust creation. Information submitted by the concerned party indicate likely past violations of the Department's fugitive dust regulation. Requirements were discussed with the responsible parties, who agree to implement corrective actions.</p> <p>Mt. Carmel is in the process of determining if they need a construction permit. KCRO is also looking into the matter.</p>								
KCRO	3/29/2021	3/22/2021	Raymond Pendleton	Easton Buchanan	Open Burning	DS		

**Monthly Air Pollution Control Program Detail Report**  
**Concerns Investigated Between**  
**March 16, 2021 and April 15, 2021**

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 45503 <b>Concern Info</b> On March 13, 2021, Mr. Pendleton started burning again, and the fire has been burning/smoldering all last week. Burning is occurring in the creek bed. The smoke was toxic and smelled like burning plastic. The smoke has been affecting the concerned party's residence. A deputy from the Buchanan County Sheriff's Department responded, so there should be a report. Mr. Pendleton allegedly told the deputy that a plastic pool had accidentally caught fire.								
<b>Comments</b> Evidence observed during the investigation indicate the pool liner was burned unintentionally. No violations were observed.								
KCRO	3/24/2021	3/22/2021	Republic Foods/Valley Oaks Steak Company	Lone Jack Johnson	Odor	KR		
<b>Concern No.</b> 45514 <b>Concern Info</b> Date of Incident: Saturday, March 20, 2021  Horrible odors at the house today. Wind is coming out of south and when that happens we get hit. Smell is from republic foods facility. It seems worse on 800 road just to the north of the facility.								
<b>Comments</b> Some odors were detected, but the odors were well below the regulatory threshold. No violations were observed.								
KCRO	3/24/2021	3/23/2021	City of Kansas City	Kansas City Platte	Odor	MC		

**Monthly Air Pollution Control Program Detail Report**  
**Concerns Investigated Between**  
**March 16, 2021 and April 15, 2021**

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 45548 <b>Concern Info</b> Horrible smell lasting several weeks, presumably from fertilizer from animal waste.								
<b>Comments</b> This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program (KCAQ).  Additionally, the odor appears exempt since the cause is fertilizer application to crops.  According to KCAQ, they have been monitoring odor out there since March 4th. They've been in compliance so far, and the farm management company told KCAQ on Tuesday that they are done spreading fertilizer for the year.								
KCRO	3/29/2021	3/29/2021	Republic Foods - Valley Oaks Steaks	Lone Jack Johnson	Odor	JH		
<b>Concern No.</b> 45592 <b>Concern Info</b> Horrible odors at my home. The smell on 800 road is even worse. Coming from Republic Foods on Hwy 50								
<b>Comments</b> The only odor I could smell was odor I associate with a cattle lot. All the cattle lots in the area are exempt from the the Missouri Air Conservation Commission Regulations. There was no odor violation noted.								
KCRO	4/6/2021	3/30/2021	AA Quarry, LLC	Kingsville Johnson	Fugitive Particulate Matter	CK		

**Monthly Air Pollution Control Program Detail Report**  
**Concerns Investigated Between**  
**March 16, 2021 and April 15, 2021**

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No. 45681</b> <b>Concern Info</b> Air quality concerns. Once again AA quarry is not keeping blast clouds from going over the property line. My family was outside when they did this and rushed inside to keep from breathing the explosive material. When is the DNR going to revoke their permit for doing this?								
<b>Comments</b> The concerned party's video, which had been provided to the Department, appeared to confirm AA Quarry was in violation of 10 CSR 10-6.170, Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin. At the time of the site visit, I could not confirm the violation; however, the facility was not blasting at the time. AA Quarry was advised that allowing fugitive dust to leave the property is a violation of Missouri's air quality regulations. The concerned party was advised to keep the Department informed of dust issues. Further investigation may be warranted if the issue does not resolve.								
KCRO	4/5/2021	4/5/2021	Republic Foods - Valley Oaks	Lone Jack Johnson	Odor	JH		
<b>Concern No. 45652</b> <b>Concern Info</b> Have smelled republic foods on 4/2, 4/2, and today 4/4. Family outside trying to enjoy easter and it just stinks. Smell it all the way down the road to 800 road								
<b>Comments</b> Odors were very faint and well below a 2:1 threshold of a scentometer. The odor appeared to be from the Animal Feeding Operation. The size of the Valley Oaks Feeding Operation is exempted from the Missouri Air Conservation Commission odor regulations. No violations noted during the site visit.								
KCRO	4/6/2021	4/5/2021	Ideker - Mosby North Quarry	Mosby Clay	Fugitive Particulate Matter	JS

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 45653 <b>Concern Info</b> From voicemail -- Monday, April 5, 2021, at 4:45 p.m.  I live out here on Cameron Road. I want to complain about the Ideker rock quarry. Just blasted about 4:40 - dust all over. I just shut my windows; it's all over the house. Not real happy.								
<b>Comments</b> No violations were observed during the investigation. However, because it appeared a violation could have occurred if the wind direction were different, a letter requesting further action is being sent to the facility.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between March 16, 2021 and April 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	45679	Concern Info	I have a neighbor that has a Single Housing Construction Business in the City Limits of Savannah, Mo. next door to where I live.  I have spoken to him several times about the State and Local laws on open burning of Trade Waste & Vegetation Waste. He blows me off and attempts to shout me down, not good, very unprofessional. Two weeks ago I ran him copies of the current Mo. laws on Trade and Vegetation open burning which I wanted to share with him. He shouted me down, walked off and said no discussion needed.  I have also met with our local City Administrator Bruce Lundy. This has gone nowhere. I believe Bruce talked to my neighbor but follow up and results have not changed. Neighbor continues burning at will.  This person does not have a Permit to burn Trade Waste, nor is he 200 yards from his nearest neighbors closet building, nor does he have an Air Incinerator for burning Trade Waste. More like <100 feet from nearest building (houses) owned by others.  My neighbor has had two Illegal Trade Waste burns 2021 and is stacked ready for a third burn. In this case he is combining both Trade and Vegetation Waste.  During the summer months he burns his Vegetation waste and others Vegetation waste. This is against Missouri laws. Vegetation waste can only be burnt on the property where it originates not hauling in Vegetation from others property and burnt.  My neighbor allows others to dump Vegetation waste on his burn pile as well as himself hauling in Vegetation waste from others properties.  At times the smoke is so thick I cannot see houses South of my house which are less than 75 feet.  This person seldom follows State or Local burn laws when it comes to sun up or sun down, in our case City is 6:00a.m -6:00p.m. nor does he have anyone in attendance full time during the burning process.					

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between March 16, 2021 and April 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
This has been an issue for over three years. With Covid-19 Pandemic and our ages of 80 & 81, we have decided enough!!								
<b>Comments</b> No open burning was observed during the investigation. Information was provided, and the responsible party agreed to be in compliance.								
KCRO	4/8/2021	4/7/2021	Republic Foods - Valley Oaks	Lone Jack Johnson	Odor	JH		
<b>Concern No.</b> 45677 <b>Concern Info</b> Bad odor coming from the south at 800 road and 18971 Road Appears to be from the slaughterhouse facility owned by Republic Foods								
<b>Comments</b> There was no odor present off site. No odor violations at the time of the investigation								
KCRO	4/8/2021	4/8/2021	Custom Truck One Source	Kansas City Jackson	Other Hazardous Waste Generator: Stormwater Contamination	MC		
<b>Concern No.</b> 45746 <b>Concern Info</b> Custom Truck One Source (CTOS), located at 7701 Independence Ave, in Kansas City Missouri has many issues that may easily become hazard to the surrounding environment. All of these issues have been brought to management's attention multiple times and no efforts to remedy these situations have been taken. The below mentioned issues are only at the Kansas City Campus of CTOS, however many similar issues can be seen at other CTOS locations with senior, executive level management having direct knowledge of the non-compliance and deciding to not remedy the situation. See SharePoint #29042 for full details.								
<b>Comments</b> This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No. 45776</b> <b>Concern Info</b> We have lived next door to the landfill for 20 yrs or so. IN recent years we have had trouble with trash and the SMELL from there. The birds are bad. And we can't even go outside and enjoy the weather or being outside because it smells so bad. A the gas tester in our basement keeps going off and they just keep telling us that its a bad tester. I should not have to stay in my house and not be able to go outside and enjoy my place and the fresh air because they are not doing what they are required by law to do. My Husband and son worked for the landfill when we purchased the property and we didn't have this problem for years. WE have neighbors who live real close by and witnesses to the smell and the trash. Who come to my house regular who have complained about the smell.								
<b>Comments</b> On-site investigation conducted. Odors were found at the time of the investigation, but no violation of the odor rule was found.								
NERO	3/26/2021	3/24/2021	Jason Holbrook	Millersburg Callaway	Open Burning Littering	DB		
<b>Concern No. 45887</b> <b>Concern Info</b> Caller reports burning and litter from residential properties with litter clogging culvert at Mule Trail Rd.								
<b>Comments</b> Found to trash in culvert, and burning at this site is permitted as household trash. No violations of the open burning rule or solid waste management law were found during the investigation.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p><b>Concern No.</b> 45767    <b>Concern Info</b> The caller reports that they experienced strong odors from Eagle Ridge Landfill last Thursday, March 25. The odors were as bad as the day of our investigation on March 22. The caller said a voice mail was left on my phone. There is no record of the call or a voicemail to my phone on March 25.</p> <p><b>Comments</b> On April 6th 2021, I, Ryan Dawson and Steve Boone conducted an odor investigation downwind from the Eagle Ridge Landfill. Based upon observations and information obtained during the investigation, it was determined that odors from Eagle Ridge Landfill were found to be in noncompliance with the Missouri Air Conservation Law and the Missouri Air Conservation Commission Regulations.</p>								
NERO	4/6/2021	3/29/2021	Eagle Ridge Landfill	Bowling Green Pike	Odor	SB		
<p><b>Concern No.</b> 45794    <b>Concern Info</b> Caller reports that they are experiencing trash odors today. Winds are out of the south and the temperatures have warmed up, so it is really bad today. I asked about the strength of the odor on a scale from 9 to 10. She said that it was about a 9 today.</p> <p><b>Comments</b> Issued a Letter of Warning for violation of the odor regulation. Require the facility to submit a plan within 30 days of letter date addressing how excess odors will be addressed. This is a Federally Reportable Violation.</p>								
NERO	4/2/2021	3/30/2021	Unknown	Higbee Randolph	Open Burning	RD		
<p><b>Concern No.</b> 45651    <b>Concern Info</b> Caller reports that burning is being conducted at the railroad building on S. Randolph St. in Higbee, MO. The caller was not sure what materials are being burned.</p> <p><b>Comments</b> On-site investigation conducted. No evidence of burning. No violations were found.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	45721	Concern Info	The renters at 204 Highway 5 and 240, Fayette, MO on Monday, March 29, at around 9 p.m. (during a red flag warning) burned a big pile of junk in their backyard. What they are burning we would think is not legal. Is this something your office wants to know about? They do this several times a year, always after dark. In fact, they burned some more stuff on Tuesday April 6, around 7 p.m.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments	<p>On April 13, 2021 I conducted an open burning investigation at the address of 204 Highway 5 and 240, Fayette, Mo. This residence is owned by Colleen Thurmon of Fulton, Mo, and rented by Sinda Easley and Tiana Lyle. Upon arrival at the property, I spoke with Tiana Lyle and told her that I was conducting an open burning investigation and her address seemed to be the source of concern. Tiana stated that they had been burning wood, mattresses, box springs, yard waste and other items behind the house. Tina also stated the last time they burnt was around March 20th. I asked Tina for her, Colleen Thurmon and Sinda Easley's contact information which she gave. Tina Lyle also called Sinda Easley while I was on site and I spoke with her about the investigation. I told Sinda and Tiana about the investigation, complaints and asked if she had been burning behind the house. Sinda acknowledged that she had been burning waste behind the house to clean up the property. I told Sinda and Tiana that there were open burning regulations enforced by DNR and I would like to inspect the contents of the burn pile behind their house to see if there were violations. Sinda and Tiana gave me permission to inspect the property and burn pile. While talking with Sinda and Tiana I also mentioned that if there were items found in the burn pile that were in violation of the open burning regulations that DNR would send them a notification. They would have 30 days to respond to the notification with proof that the burn site had been cleaned up, in the form of a landfill receipt. I also told Sinda I would leave a copy of open burning fact sheets, regulations and a business card so she could call if there were any questions.</p> <p>Upon investigating the burn pile I noticed several items that had been burned in violation of the Missouri open burning rules. Items such as mattresses, box springs, processed wood, rubber, plastics, Styrofoam's. Other items in the burn pile included, cans, bottles, broken glass, yard waste, metal and household waste. I also noticed an unburned pile of cardboard and Styrofoam, possibly on the neighboring property.</p> <p>After investigating the burn pile, I spoke with Tiana Lyle about my findings. I told Tiana that I did find burnt items that were a violation and what the items were. I also told Tiana that DNR would be sending a letter and they had to respond to the letter within 30 days of receiving it. I also told Tiana they would have to provide proof in the form of a landfill or dumpster receipt within the 30 days as well. Before leaving I gave Tiana a burning fact sheet, a copy of regulations and my business card.</p> <p>On April 14, 2021, I called Sinda Easley as a follow-up to my April 13th investigation. I told Sinda that DNR would be issuing a letter of warning and she would have to respond within 30 days of the dated letter. I also told her how to dispose of the ash and what documentation she must provide to the department as proof of disposal. Sinda stated that she was unaware of the open burning regulations and that she was burning the items to clean up the property. I told Sinda that it's very common for people to be unaware of the open burning rules and explained to her what items can and cannot be burned. Sinda stated that she would clean up the burn site, respond to DNR as quick as possible and would quit burning items that violated the open burning rules.</p>

Concern No.	45584	Concern Info	SP:28614 Recycling Works					
			For a few days they were getting rid of some debris and now they're burning the rest of it. They are burning it right now (8 a.m.) and there's black smoke all over the place. CP is not sure what kind of debris they are burning but it looks pretty nasty. He assumed they're burning whatever they can take to a landfill or get rid of however else they were trying to get rid of.					
Comments	At the time of this investigation, several brush piles were noted on site. I took photographs and left my business card.							
	On March 22, 2021, I interviewed Aaron Espinoza, President of the Citizens Bank of the Midwest in Rolla, since the bank owns the property. Aaron Espinoza stated that the bank has been cleaning up the property. Some cardboard and brush were open burned on site. Otherwise, the former owner hauled much of the material to another location for storage. Materials hauled included plastics, barrels, packing peanuts, etc. Additional materials were taken to the landfill by the bank. It is intended that the site be cleaned up and then sold, since the building is still in good shape according to Aaron Espinoza.							
	I e-mailed two fact sheets, (Facts on Open Burning Under Missouri Regulations, Managing Construction and Demolition Waste) and the pertinent open burning regulation (10 Code of State Regulations 10-6.045 Open Burning Requirements) to Aaron Espinoza.

<p><b>Concern No.</b> 45554    <b>Concern Info</b> SP:28725 Is this facility operating with the proper permits required by the state? I think other similar facilities are required to get perm for this type of business</p> <p><b>Comments</b> This facility is a very small sawmill with only 6 employees. The facility operates a circular saw to saw logs and a grinder or hog to turn waste into mulc There are no band saws, no planers, no boilers, no kiln drying of lumber, etc. The facility produces rough cut lumber from logs and sells it through a broker. It is believed that the potential to emit criteria air pollutants from the activities at this facility is not great enough to require an air permit or permits.</p>

<b>Concern No.</b> 45665 <b>Concern Info</b> SP:28741 The concerned party reports that an unknown party is open burning a house near Cabool. There is a backhoe on site.								
<b>Comments</b> ?At the time of my investigation, I was unable to determine if a house had been open burned or not. I was not able to research this area online to find additional evidence. I spoke with Cindy Livingston by telephone and I was told that a local caretaker had been trying to clean up the location and had used a foundation where a building had been at one time as an open burn area. The caretaker was also manually recovering and removing scrap metal for recycle. I explained that the open burning of wastes for disposal in Missouri is only allowed for businesses in very limited circumstances. Cindy Livingston stated that the open burning was completed; but that if I would e-mail the fact sheets Managing Construction and Demolition Waste, Facts on Open Burning Under Missouri Regulations, and the Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements that these documents would be shared with the caretaker and that they would let me know if they had any questions.								
SERO	3/25/2021	3/22/2021	Mr. Tommy Price	Cuba Crawford	Other Other	TR		
<b>Concern No.</b> 45723 <b>Concern Info</b> SP:28738 Concern: They are bringing in contractor waste from off site and burning it at this location. They have also torn down a fence to the neighboring property that doesn't belong to them and they are burning there also. The waste they are burning is hauled in with 20 ft trailers and burned on site. They have also moved in multiple campers and it is believed that the septic system has not been set up correctly.								
<b>Comments</b> ?At the time of the investigation, there was no evidence of current open burning in the area described. No violation of Missouri Air Conservation Commission Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements was observed. The fact sheets Facts on Open Burning Under Missouri Regulations and Managing Construction and Demolition Wastes and a copy of the regulation 10 CSR 10-6.045 Open Burning Requirements were sent to an address found online for Tommy Price.

Comments	<p>contacted Joseph Delia on March 31, 2021 regarding security and covid requirements at the Green Farms facility in Cuba. The next day, April 1, 2021 site visit was made. I met with Mike Dierkes who accompanied me during the investigation.</p> <p>The Green Farms facility has applied for four licenses with the Missouri Department of Health and Senior Services. One is for cultivation and has been approved. Cultivation is the only activity taking place at the facility as of the time of the investigation according to Mr. Dierkes.</p> <p>Another license has recently been approved for extraction of oil from the plants. This will be accomplished by placing the harvested product in socks and using a closed-loop butane extraction process to remove the oil. Bins have been set up for vegetative waste from the greenhouse (pre-extraction) and waste after having passed through the extraction process. The actual disposal method of this waste is still being determined and will depend of sample which is planned after this segment of the facility becomes operational.</p> <p>Two additional licenses have been applied for regarding manufacturing of infused products such as gummies, food, and vape products.</p> <p>Wastewater from the facility is connected to the Cuba municipal collection system and facility products and equipment is currently located in greenhouses or warehouses where it is protected from contact with stormwater.</p> <p>No noticeable odor was observed at the time of the investigation. According to Mr. Dierkes, the most likely time for an odor to be present is between the time that a crop of marijuana "blooms" and the crop is harvested. The blooming is an indicator that the crop is ready for harvest and the time between blooming and harvesting is usually pretty short, however, multiple strains of marijuana are grown and each strain has its own growing specifications meaning that blooming stage occurs at different times for the different strains. An air recirculation device is installed on the greenhouses and a carbon filtering device is installed on the warehouse.</p> <p>10 CSR 10-6.165 Restriction of Emission of Odors includes an exemption regarding the "emission of odorous matter from the raising and harvesting of crops".</p>

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 45770 <b>Concern Info</b> SP:28908								
At 527 County road 6020 they are burning about 1/2 acre of OLD stock piled shingles that are around 2 to 3 feet deep. I understand it is an environmental issue. And is against the law. These are suppose to be hauled out and taken to a safe place for disposal. I have tol these people that. They still say they CAN and WILL burn and then BURY the remains if Anything. I would think they are Not above the Law. I had a friend come out here and take pictures and Video of the event. They are still pursuing this avenue of disposal.								
<b>Comments</b> ?At the time of my investigation, the evidence for the open burning of shingles was not observed. There was land clearing activity and evidence of sor open burning associated with the land clearing. I left the fact sheets Facts on Open Burning Under Missouri Regulations, Managing Construction and Demoliton Waste, the regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements, and my business card because no one was on site. I later was contacted by Felicia Beyer by telephone who stated that no more open burning was planned. Some open burning had occurred before she realized that the roofing shingles were present on site andsd would burn with the brush that was being cleared from the farm. Felicia Beyer stated t her farm, which was recently purchased at an auction, was a part of a property that had historically been used as a dumping ground for roofing shingle and other waste about 30 plus years ago. As a result, it was more difficult to find someone to take these roofing shingles because of their age and degree of decomposition. However, Felicia Beyer stated that no open burning of shingles was planned for the future and that the amount of shingles v not something that she had anticipated when she started the land clearing and farm clean up; but that there is a disposal plan in place now that does i involve additional open burning; but does involve hauling them to a recycler for compliant disposal. The shingles will be hauled off along with scrap me which was also present in large quantities due to past dumping.

<b>Concern No.</b> 45574 <b>Concern Info</b> Caller expressed concern about properties at the intersection of Upper Bottom Road and Jungs Station Road where they anticipate an upcoming demolition of two homes for a new subdivision. The main concern was asbestos related. They said the buyer of the property was Rolwes.								
<b>Comments</b> I called the corporate number of Rolwes and was forwarded to a property manager named Adam. He acknowledged that they purchased property at tl intersection of Upper Bottom Rd & Jungs Station Rd in St. Charles. The property was newly purchased this past Wednesday 3/10/21. I asked if they planned to demolish the homes in place, he said yes, but that it has been contracted out to Karrenbrock Excavating LLC. Adam said that he would reach out to Karrenbrock and give them my contact information and make sure they followed the proper process. I explained they would first get an asbestos survey done prior to demolition and this would support whether it was a regulated project or not. I also explained even if it ends up not being regulated, it is good to share that survey and do a courtesy notification with our department proving that the project is not regulated.								
Even though he said he would talk with their contactor Karrenbrock, I also sent Karrenbrock this email because they do not accept private calls, which my only current option. <a href="mailto:office@karrenbrockconst.com">office@karrenbrockconst.com</a>								
"I am reaching out in relation to a potential upcoming demolition of homes at the intersection of Upper Bottom Rd & Jungs Station Rd. I received a community concern in anticipation for the demolition and wanted to provide some information if a demolition is part of the plan.								
An asbestos survey is required prior to demolition. The survey provides a basis of whether a project is regulated or not based on the results of the sur Here is a link of certified inspectors that may perform a survey: <a href="https://dnr.mo.gov/env/apcp/asbestos/inspectors/index.php">https://dnr.mo.gov/env/apcp/asbestos/inspectors/index.php</a>								
For guidance after the survey, please feel free to contact me."								
Adam Baer called me back to tell me he spoke with Karrenbrock Excavating and they plan to get a survey and send results to DNR.

Concern No.	45808	Concern Info	Karen Somogyi is concerned about the large yellow commercial building near her home in Hermann. The building was recently sold by the city, and the new owner plans on either demolishing it or renovating. She believes the building is full of asbestos and that the city/owners are not taking proper precautions. She called the previous day with general questions and I entered it as a contact log, and told her to keep me updated with the activities at the property. Today, she called saying that she observed a flatbed truck outside the building and materials being removed from the building.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments	3/18/21							
<p>I spoke with the City of Hermann, who was able to provide me with the official listed address of the building (910 Jefferson Street) and directed me to Gasconade County Clerk (573-486-2711). They were able to provide me with the name of the current owner, Brad Kohlbusch, and his contact information. I spoke with Brad and explained that we had received an asbestos concern regarding the property he recently purchased. Brad told me he was informed that an asbestos survey was done recently at the property, and that the survey found no asbestos in the building. I asked for a copy of the survey, and Brad told me he would track it down and e-mail me a copy in the next few days. I asked if the building had any insulation, or a boiler (both commonly contain asbestos) and he told me that the building has no insulation, and no boiler; just cinder blocks, concrete, steel, and gas heaters. I explained the asbestos regulations to Brad and provided him with a link to our website.</p> <p>Once I receive the asbestos survey, I will verify that it was done by a Missouri licensed asbestos inspector and that an appropriate number of samples were taken. If Brad decides to go forward with demolition, he will be required to submit a notification to the Missouri Department of Natural Resources well as provide us with a grace period before demolition begins. During this grace period, I or another asbestos inspector will walk through the building and verify that the survey was thorough, and that no potentially asbestos containing materials were overlooked.</p> <p>Before demolition/renovation, Brad is allowed to remove materials from the building such as scrap metal, regular trash, etc. as long as no potentially asbestos containing materials are disturbed, and no load bearing structures are impacted.</p> <p>I called Karen and let her know what I had found. I asked Karen to contact me if it appeared that any construction/demolition was taking place at the property, and told her I would keep her updated on my findings.</p> <p>4/15/21 I called Brad and left a voicemail asking for updates. He returned my call later that day and explained that he is not going to demo/renovate the property himself, or have anything done while he owns the property. He is looking to sell the property and has several interested buyers. He said that he has just received a report but is not sure that it is an asbestos inspection. He said that someone looked at the property and was concerned only with the window caulk/glazing as being potentially asbestos containing, but he is not sure if any samples were taken. I told Brad to keep me in the loop and get me in touch with the new owners once he sells the property. I confirmed that no potential ACM has been disturbed yet. I told him to make sure the new owners are aware of the potential ACM and pass along the information that I sent him regarding the need for an asbestos inspection before any work started. He told me he would contact me as soon as he knows who is buying the property.</p> <p>4/22/21 I contacted Karen and let her know my findings. I told her that since Brad plans on selling the property and not doing any work himself, that it</p>

<b>Concern No.</b> 45813 <b>Concern Info</b> I received the following email from Chris Patterson the evening of 3/18/21 :  The mitigation effort seems to have worked temporarily, but the smell has recently returned (same smell as before). I have confirmed with others residents in the area. It is noticeably worse as you get closer to the area near the GM plant (Near Hwy A and I-70).  <b>Comments</b> I sent the following email in response to Chris' concern:  "Good morning Kristin,  I did do a follow-up investigation at GM and the surrounding area on Monday 3/8 where I observed odors related to components of their manufacturing process, but not mold/mildew and still no odors in exceedance of our odor rule.  When you do smell this moldy/mildew odor, please send me time, date, description and wind direction. This is helpful for an investigation.  Additionally, GM is still accepting odor concerns to their e-mail wentzville.environmental@gm.com The efforts GM took toward the odor concerns initially were all voluntary because they were not in violation. As of now, unless the moldy/mildew odor is proven to come from them again and it reaches the threshold of an odor violation, any forward action by them would also be voluntary.  Please feel free to e-mail or call my direct line below my signature with any additional concerns you may have. I appreciate you reaching out to me. "  I also contacted Courtney Tieman to ask how frequent GM was doing their own odor surveillance. She responded 4-5 times per week and they attempt to investigate concerns as they are received.  GM also plans to be shut down June 6-August 1 and December 12-January 2 for construction at the facility. I asked what they plan to do differently during this shut down to ensure the sludge does not become musty. They plan to keep on pumps in lieu of saving power.

**Concern No.** 45814    **Concern Info** I received the following e-mail from Ms. Kristin Lewis the evening of 3/18/21:

"I wanted to let you know that I have noticed the moldy/mildew smell again near the Lake St. Louis/Wentzville area again. I you know if the GM plant is going to address it?"

**Comments** I sent the following email in response to Kristin's concern:

"Good morning Kristin,

I did do a follow-up investigation at GM and the surrounding area on Monday 3/8 where I observed odors related to components of their manufacturing process, but not mold/mildew and still no odors in exceedance of our odor rule.

When you do smell this moldy/mildew odor, please send me time, date, description and wind direction. This is helpful for an investigation.

Additionally, GM is still accepting odor concerns to their e-mail wentzville.environmental@gm.com The efforts GM took toward the odor concerns initially were all voluntary because they were not in violation. As of now, unless the moldy/mildew odor is proven to come from them again and it reaches the threshold of an odor violation, any forward action by them would also be voluntary.

Please feel free to e-mail or call my direct line below my signature with any additional concerns you may have. I appreciate you reaching out to me. "

I also contacted Courtney Tieman to ask how frequent GM was doing their own odor surveillance. She responded 4-5 times per week and they attempt to investigate concerns as they are received.

GM also plans to be shut down June 6-August 1 and December 12-January 2 for construction at the facility. I asked what they plan to do differently during this shut down to ensure the sludge does not become musty. They plan to keep on pumps in lieu of saving power.

Kristin later gave me a time/day of odor March 19th 9pm off of highway Z & N. According to NOAA data from 5:45pm to 10:54pm the wind was coming from the North East 50 degrees. This is a consistent wind direction from GM to the intersection of highway Z & highway N. She also shared that she would pass her concern onto the GM email I provided.

<b>Concern No.</b> 45810 <b>Concern Info</b> On Thursday March 25, 2021 the anonymous concerned citizen reported that "The musty/chemical smell from the GM plant was back today. It was dormant most of the winter." Location: Hwy 64 & 70								
<b>Comments</b> In relation to a handful of repeat odor concerns and a follow-up investigation conducted on 3/8/21, I reached out to Courtney Tieman again with the following email: FYI- I received two new odor concerns this morning related to GM. No time, date, wind direction specifics. One said same smell as before near highway A & 170 the other stated moldy/mildew in the Lake St. Louis-Wentzville area again. Can you think of any reason why there were not notable odors in January and February? Could the sludge pit systems have built up that fast? Also, were there components of that system that were not cleaned out during the clean-up that could be harboring that same odor?  Courtney's response: The entire system was thoroughly cleaned over our winter shutdown. The amount of sludge generated during the last 2.5 months that is currently in the sludge pit is consistent with our production over this same period and has not built up to the amount we had in the pit at the end of 2020 when we initiated our cleaning. The typical sludge odor may be more noticeable during warmer temperatures.  4/1/21 I performed odor surveillance and noticed odors related to GM manufacturing processes. This odor could be described as chemical in nature, I could also understand someone describing it as musty- more of a stuffy smell. However, none of these odors reached a 7:1 ratio on the nasal ranger.

### Concerns Investigated Between March 16, 2021 and April 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	45817	Concern Info	Mr. Sam Irons is a current employee of GM and has called me twice about this issue since he saw me on the news for the GM odor concern. A couple of weeks ago I suggested he contact OSHA, he has and now hasn't heard back from them and would like for me to follow-up with them if possible. Information to share with OSHA: GM is using chemicals that are not disclosed in their chemical logbook to employees. The two that Sam is particularly concerned about are epoxy resin and potassium dichromate because he is allergic to these substances. He also feels the ventilation is not good enough where these chemicals are used.					
Comments	On 3/30/21 I left a message at the general phone number at the St. Louis Area OSHA Office 314-425-4249 with the details of Mr. Iron's concerns referencing the gentleman that he said was handling his case, Kevin Ludvik.  On 3/31/21 Mr. Iron called me back again to ask what I heard from OSHA and I told him about the message I left but had not heard back. I emailed Mr Iron a link to file an online concern with OSHA and expressed they may be working from home and this may be the best way to get through to them. I told him to let me know if he had trouble with filling the form out. <a href="https://www.osha.gov/pls/osha7/eComplaintForm.html">https://www.osha.gov/pls/osha7/eComplaintForm.html</a>  Shortly after, I received a phone call back from Mr. Ludvik explaining that he handled Mr. Irons case a few years ago, he did the inspection, he wrote them citations, GM paid the fines, Mr. Iron had attorneys and sued GM. He wasn't sure what else he could do for Mr. Iron's but said that he would call him back. I thanked him for his time.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No. 45812</b> <b>Concern Info</b> Caller reported that he smelled the musty odor from GM at the Wentzville Walmart last Tuesday (3-30-21) and it is really strong today. He just wanted to report that the musty odor has returned and wanted to make sure DNR knew about it. I explained that we had started to receive reports of the odor and are in contact with GM. I informed the complainant that GM has plans to replace the offending paint sludge system within the year but there will always be some manufacturing odors that will be emitted. The caller said he does not need a call back and just wanted to make sure we are aware that the musty odor from GM has returned.								
<b>Comments</b> Informed Caroline Kargus of the report for consideration of her site visit to the area today. This is an ongoing odor issue related to GM's paint sludge & water recycling system for the particulate matter control system for the robotic paint spray booths. The system had a deep cleaning last done at the end of December 2020, which successfully eliminated the musty stale odors but may have returned. Surveillance of the area and evaluating compliance with the "odor rule" using a "Nasal Ranger" will continue as complaints are received. Tom Sims								
4/1/21 I performed odor surveillance around GM and noticed odors related to GM manufacturing processes. This odor could be described as chemical nature, I could also understand someone describing it as musty- more of a stuffy smell. However, none of these odors reached a 7:1 ratio on the nasal ranger. I also specifically visited Walmart parking lot and the only odors I was able to detect were food related from nearby restaurants.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments	<p>I visited the site in the AM hours (8:45am to 9:45am) of Wednesday, April 7, 2021. The 2413 East HWY 47 is located in Winfield, MO outside the city limit in Lincoln County ( 687724.7 Easting, 4318216.7 Northing +/- 4.77 meters). It was a sunny day. Wind was calm out of south.</p> <p>There was nobody on site at time of my visit to talk to. There were few houses here and there far apart (approximately 400 to 500 yard from each other estimated no more than 6 or 7 houses in a square mile of an area) on both side of the highway. I stayed about an hour in the area.</p> <p>There was no active open burning going on at the time of my visit. However, there was some smoke (you cannot see the smoke from a distance unless you get closer to it) coming from an earlier burn pit located north of the house. The pit was covered with dirt. The place looks like a farm rather than a residence. There is a house with broken doors and walls and a barn kind of structure at the back of the house located north of HWY 47. I saw some piles of wood /trees generated from farm land clearing. It looks like there is a land clearing operation going on expanding the farm further north. I did not see a mail box at this address. I saw a large metal container/dumpster at the west side of the house with piles of solid waste in it (looks like house hold trash/ garbage/etc.). See Photos attached.</p> <p>The concerned party, who is a resident nearby called me on Friday, April the 9th, 2021 at about 10:30 am. She stated that the owners do not reside at this address. They come every now and then to open burn the trees cleared from the farm land. She contacted the county and did not get any response. I told her that Missouri regulation allows open burning of tree trunks, tree limbs, and vegetation from land clearing operations if burning takes place outside the city limits of any incorporated area or municipality and at a distance equal to or greater than two hundred (200) yards from the nearest occupied structure.</p> <p>The caller believes the owners are going to demolish the house and burn the waste. I told her I wonder if that is why the owner have the large metal container on site, to collect the demolition waste. I indicated to her that if I know the address or phone number of the owners of the property, I would contact them or mail them publications regarding disposal of demolition waste (if in fact the owners' intention is to demolish the house) to let them know that all demolition waste must properly be disposed of at a permitted solid transfer station or landfill.</p> <p>She does not know the address or phone number of the owners of the property. She told me she has the contact phone for SLRO and will call if she notices such activities.</p>

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 45517 <b>Concern Info</b> During a hazardous waste inspection, the inspector noticed black residue on the outside of the exterior duct work and the snow (at the time) that appeared to be from the facility's powder coat painting process. Inspector is unsure if the material is leaking from the vents and if this may be something the facility needs to be fixed.  Painting area is located on the southeast corner of the building. The duct work is located on the outside of the building and adjacent to the back door of the southeast corner.								
<b>Comments</b> See SharePoint #28748 - NoViolations								
SWRO		3/25/2021	Tree Trimming Service?	Clever Stone	Open Burning	RM		
<b>Concern No.</b> 45546 <b>Concern Info</b> burning 24/7 at Frank's property. He owns a tree trimming service and brings hoe 2 16 foot by 12 foot wide trailers at a time burning every day 24 hours a day. It just smokes when it is raining so caller would like you to come on a day it is not raining. Caller states the smoke fills the valley and wonders if there are any regulations that would stop him from burning that much that often. I informed him we would take a look and see if an air curtain incinerator may help the situation and if he fell with the confines of a requirement for an ACI. I let him know we would investigate and would contact him and let him know what we found. He said you can contact him with any questions.

SWRO	4/6/2021	4/6/2021	Unknown	Bradleyville Christian	Open Burning	AW		

**Concern No.** 45666 **Concern Info** House and work shops on property have been torn down and are currently burning. Caller was told to call fire department well. There are only two houses on this road, the burn is the one at the end of the road.

**Comments** Upon arrival, I found that the fire was almost out; however, the wind was blowing heavily and flames still remained within the burn pile. The Bradleyville department was called to put out the fire to ensure the fire did not spread. When Bradleyville Volunteer Dustin Mchaffie arrived, he walked with Gina Norwine (his Aunt) and stated that he did not observe anything illegal burned and that "everything that was going to burn has burned." I informed the parties that I would need to observe the pile and take photographs to document what was in the pile.

Upon observation, I found several illegal items burned such as shingles, tires, appliances, metal 55-gallon drums, among various other items.

Please see LOW for more information and photos.

**Concern No.** 45687    **Concern Info** East Joplin

This odor ceased for awhile however this last week it started again alternating early morning , evening, late night. The worst odor throughout this problem was on Saturday which was concerning. Easter weekend, family activities outside. In Sat. It was horrible such that visitors to our home had to cover noses. It took away from the time and whoever is doing this has a total disregard for the hard slap and citizens. We live off 44 th in between Connecticut and Rangeline.

Sorry for the complaint but this is very unpleasant.

**Concern No.** 45669    **Concern Info** From Rich Germinder Legislative Contact:

I had someone pass along an anonymous environmental concern in Rogersville MO.

The properties in question are:  
3552 and 3548 Johns Ford Road in Rogersville MO

"There are probably 5 different households living on a 1-2 acre area with likely no septic system. The drainage from these multiple households may be impacting others

The shacks they built are drastically not up to code. The original house burnt and less than half of it is still standing

They also burn what appears to be toxic substances as there are multiple loud explosions.

We've had several bad water tests and are concerned about the water in the area"

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 45731	<p><b>Concern Info</b> I understand that open burning is allowed in Missouri, and that each county enforces their own rules. can someone head m in the right direction of rules for burning outside of city limits?</p> <p>I live in the country in Christian county and have a renter neighbor that burns LARGE piles of tree rubbish with trash cans c garbage thrown on top and occasionally a couch gets burned as well. they burn no matter the wind or weather and twice now, I have ash all in my yard.</p> <p>I'm just across the road from the nuisance and have had cancer once, so this concerns me for not only my welfare, but for the kids that live here as well.</p> <p>I'm wondering if this can be stopped, or do I just live with it?</p> <p>Thank you for the assistance you can provide</p> <p>Vicky Justen</p>							
<b>Comments</b>	<p>No violations. I arrived onsite with Wendell Hall and we found the burn pile in front of the yard of 205 Valley Vista. I photographed the burn pile and contacted the house. The resident of the house claims that the property is owned by Keith Mills whom he contacted. Mills is an asbestos inspector whom I met in my other inspection. The burn pile consists of vegetative waste. I can say that it is about 5 cubic yards total volume. However, it can als be seen that the burn pile did not burn successfully, probably since it is wet. I can estimate that the amount of materials burned is less than 1/2 cubic yard (Photo 1).</p> <p>Mills arrived and confirmed that the property is his. Mills also confirmed that they have cleared the lot there and have been burning bush there for a month now. I asked him about the burn pile. Mills told me that it was his and they came from the nearby property which belonged to his dad. Mills said that they have been burning vegetative waste for a while but mostly from the brush on that property.</p> <p>I cleared up with Mills that burning of vegetative waste is allowed as long as it came from within the property. According to open burning rules, vegeta waste is yard waste and they are allowed to be burned. Since only a very small amount of it was burned coming from outside, I only told Mills that he cannot burn there any trash that does not come from the property, moving forward. Mills agreed that the remaining trash will be sent to the dumpster. Also Mills informed me that the trash on his pile, which was not also burned did not come from him. I told Mills that it is classified as promiscuous dumping and will be his responsibility also. Mills said he will dispose of those accordingly also.</p> <p>We exited the site afterwards.</p> <p>See SharePoint #29065</p>
